

TIMELINE OF HATE CRIMES

TOTAL_OFFENDER_COUNT, TOTAL_INDIVIDUAL_VICTIMS and VICTIM_COUNT by Year

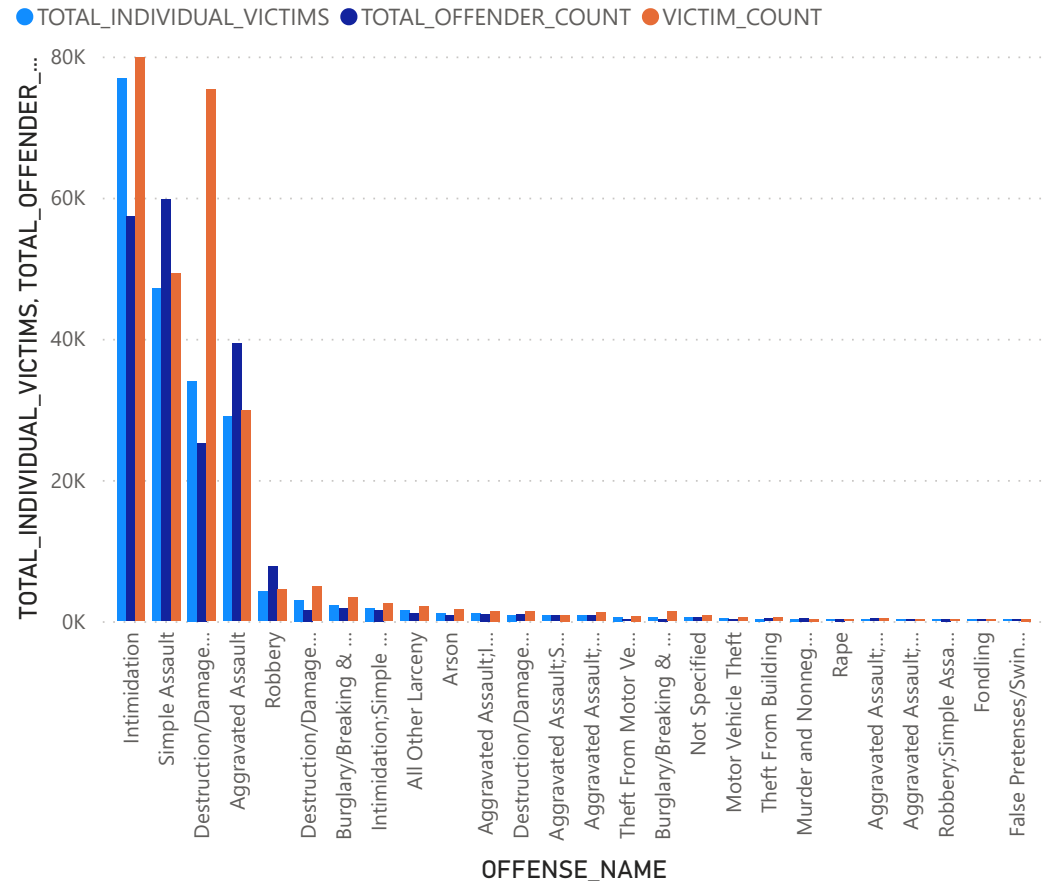

The number of individual victim counts per offender rises from 1991 till 1995 and declines till 2000, where it shoots up. The count drastically decreases, post-2000 till 2007. The numbers steadily decline till 2015, beyond which, the increase is exponential with an all-time high in 2020, where the number crosses 10k that year for the first time in history. The total offender count and the total victim count also follows the same pattern, though while comparing the individual victims count with respect to the total offender count, the number of offenders exceeds the number of individual victims per offender, but the statistics switches thrice, once in 1995, once in 1997 and then in 2006. After 2006, the count of individual victims has exponentially exceeded that of the total offender count.

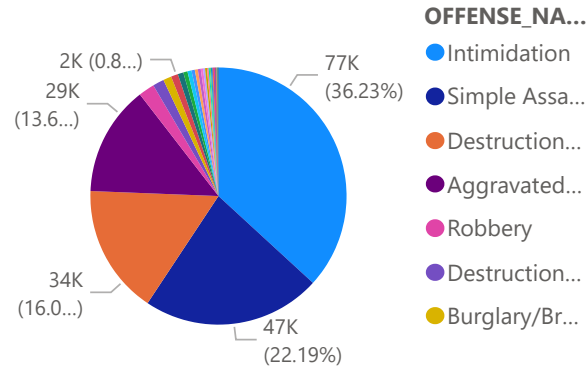

HATE OFFENSES

Most of the hate crimes fall under the categories of **Intimidation**, **Simple Assault**, **Aggravated Assault** and **Destruction/Damage/Vandalism of Property**. The total Individual Victim Count, as well as the total Victim Count is the highest due to **Intimidation**. But, the total Offender Count is due to **Simple Assault**. **Robbery**, **Burglary/Breaking In**, **Larceny** and **Arson** and other crimes take up about 10% of the hate crimes in the US.
